Therm Tech Incinerator

Therm-Tech Incinerator is a package type, all weather type and mounted on base frame for easy transportation. Incineration is batch type and waste feeding is manual. The Incinerator has 2 chambers, primary chamber and secondary chamber. Both the primary and secondary chambers are provided with pressure jet burners for incineration of bio-medical waste. For general waste burner is provided only in primary chamber. The primary chamber is provided with air pressure nozzles. Cyclone separator & Forced draft fan are provided and mounted on the base frame of the Incinerator to ensure that no ash particles are let out of the exhaust. The quality of incineration achieved is excellent. A dust proof pre-wired control panel housing all safeties, temperature controllers for primary chamber, secondary chamber and flue gas temperatures are provided. It also incorporates contactors, overload relays and MCBs for electricals. Alarm hooter is provided along with audiovisual alarms for abnormal working conditions. In case of defect in the process, the Incinerator comes to a stand still and the fault is indicated on the control panel. Suitable protection for burner is provided. Waste charging door and ash removal door is provided on the Incinerator. The Incinerator is refractory lined and does not require any civil works at site.

Why choose us?

- ❖ Our industrial heaters promise high performances and are built using the latest technology.
- ❖ All our products are designed keeping in mind the customer's needs.
- ❖ Our heating units are built for high durability, less noise, maximum efficiency, and reliability.
- ❖ Our expert team strictly follows the total quality management.
